CLARESHOLM LOCAL NEWS

A tag day for the Red Cross will be held on Saturday, December 5th.

The Curling Club is arranging to put on a dance about the middle of December.

Mr. Wiggs, piano tuner for W. G. Moffatt, will be in Clareholm the coming week.

The Curling Club held a meeting on Wednesday evening to arrange for a season of activity.

D. A. Anderson will be shipping a car of live poultry about the second week in December. Photos make very acceptable Christmas gifts. Call at the Clareholm Studio and leave your order.

Worry no more about making Christmas gifts—buy them ready made at the W. I. sale, November 28, Harrison Hall.

See Betty Balfour in "Reveille" at the Rex theater on Friday and Saturday nights this week. It's a Welsh-Pearson production.

Do you love dainty tea tables, pleasant friends, something very chic at the tea hour? Then visit the Parish Hall December 5, at 3 p.m.

The ladies of St. John's Guild will hold their annual tea and sale of home cooking in the Parish Hall on Saturday, December 6th, at 3 p.m.

If you have not ordered a new suit or overcoat for Christmas, see H. B. Chamberlin, local agent for the House of Stone and Tip Top Tailors.

Starting the first Monday in December the Rex theater will put on pictures four nights a week—Mondays, Tuesdays, Fridays and Saturdays.

On Saturday, December 12, A. E. Runions will hold a pickup sale at the Vanhorn livery barn, Clareholm. List your stuff early with H. E. Moffatt, clerk.

Are you seeking dainty trifles for a fastidious lady's Xmas joy? You can find them amongst the "French creations" at the Parish Hall, Saturday, December 6th, at 3 p.m.

James Mitchell of Medicine Hat will offer a lot of farm machinery at auction, on the vacant lot east of the Independent elevator, Clareholm, on Saturday afternoon, December 5, A. E. Runions auctioneer.

Embroidered pillow slips, scarfs, center pieces, baby layettes, house dresses, rompers, children's dresses, articles too numerous to mention taking up kind editor's space. See for yourself at Harrison Hall Saturday afternoon, Nov. 28.

Hugh Thomas Graham and Miss Clara May Montgomery were united in marriage at the Nazarene parsonage on Tuesday, November 24, Rev. J. A. Tench officiating. Mr. and Mrs. Graham will make their home at Carman-gay.

The ladies of St. John's Guild invite you all to visit their home cooking table, or mystery booth, their fancy-work table, or bramble pie and above all not to miss their delicious chicken salad at the tea tables. Parish Hall, December 5, at 3 p.m.

Under instructions from the Administrator of Estates of the Mentally Incompetent, the farm machinery, etc., of James Rivers, will be sold by public auction on Tuesday afternoon, Dec. 1, at the farm 13 miles east and 5 miles North of Clareholm. A. E. Runions, auctioneer.

This year the ladies of St. John's Guild intend specializing on their home cooking table. If you love the "inner man" treat him to a piece to the latest in cakes or home made bread—to our famous "potted game" or delicious home made candy. On sale at Parish Hall, Saturday, December 5th, at 3 p.m.

The Annual Meeting of the Clareholm District Agricultural Society will be held in the U. E. W. A. rest room on Saturday, December 5, at 2:30 in the afternoon. All members are urgently requested to be present to decide as to the continuation of the Fair for another year.—Jas. McKinnay Secretary.

The ladies of St. John's Guild invite all lovers of needlecraft to visit their display on the fancy-work table at the Parish Hall, December 6th, at 3 p.m.

Harrison Hall is the place to prove the saying that "seeing is believing," and "tasting is proof of the pudding," afternoon Nov. 28, W. I. sale.

Don't forget to see "Crimson Eyebrows" at the Rex theater on December 1st. This play will be put on by the High School Choral Society under the direction of W. G. Moffatt.

A Brighter Day For Europe

It is a long time that has no turning. For seven long and difficult years Europe has been travelling a rocky road trying to find a way out of the morass of hatreds, bigotry, racial disorders and epidemics, and the financial wreckage following the conclusion of the Great War. Conference has followed conference, commission after commission has struggled with the problems involved, the League of Nations has patiently sought to smooth away difficulties, remove misunderstandings and create a general feeling of confidence, the supply chockers to unwise and aggressive action calculated to re-open old scores.

Slowly but surely progress was made notwithstanding the fact that the United States refused to join in the League or to participate in conferences and commissions except those which involved questions affecting payments of war debts, in which the United States is vitally interested. Had the United States, removed, as it is, from the local prejudice and jealousies of continental Europe, taken a disinterested part in helping to work out European problems, it is to say that greater progress would have been made, and the future of the United States among the nations of the world would have been infinitely higher today.

Great Britain, however, true to all her great traditions, and notwithstanding her own many and serious domestic problems and crushing war debt, steadfastly planned and worked for the salvation of Europe. Possibly to a greater extent than ever before has Great Britain demonstrated her world leadership. This may not be generally appreciated as yet, but future historians when they come to record the progress of world events and European reconstruction after the Great War can hardly fail to award credit to whom credit is due.

And at last the turning in the long lane would appear to have been reached in the conclusion unanimously arrived at by the conference recently concluded at Locarno, Switzerland, and order to which will shortly be given by the signing of a new treaty, and one which is so significant in its results, when they come to record the progress of world events and European reconstruction after the Great War can hardly fail to award credit to whom credit is due.

And at last the turning in the long lane would appear to have been reached in the conclusion unanimously arrived at by the conference recently concluded at Locarno, Switzerland, and order to which will shortly be given by the signing of a new treaty, and one which is so significant in its results, when they come to record the progress of world events and European reconstruction after the Great War can hardly fail to award credit to whom credit is due.

One of the important results to follow from the Locarno conference, and the draft of a new treaty, is the entry of Germany into full membership in the League of Nations. So long as the great central nation of Europe remained outside, the League could not possibly become the dominating factor in Europe, and the League of Nations would be an empty shell. But with Germany in the League of Nations will become reality in an entirely new sense. Many of its greatest difficulties and most serious problems will thereby be removed. It may even pave the way for a changed public opinion in the United States and the ultimate acceptance of the League Covenant by Canada's next door neighbor, a consummation most devoutly to be wished.

Trouble In Far East

Chinese Riots are Cause of Anxiety to Japanese

The London Daily Express correspondent at Tokyo says the Japanese government is showing great anxiety over the outcome of the recent Chinese riots, owing to the possibility that it might eventually lead to another Russo-Japanese war.

Should General Wei Pui Fan and his allies drive Chang Tso Lin from Manchuria, the district which Japan would be forced by the loss of her Manchurian concessions, for which she would fight rather than give up.

Shatters Personal Myth

Lord Haughey, personal physician to King George, shattered a long medical myth by prescribing for heart disease a quiet day in bed, followed by an evening at the theatre with an easy ride on the following day. Lord Haughey, he says, is better for exercise as well as rest.

COLOR IT NEW WITH

B.C. Apple Crop

Heavy Crop is Reported This Year in Southern British Columbia

Penticton, Naramata and Kamloops are this year gathering the heaviest crops of apples that the orchards have ever produced. The crop is of excellent quality and is being handled expeditiously through the packing houses. One grower reported that he picked 11 boxes of McIntosh Red off one tree. Another said he gathered 61 boxes and still another picked 51 boxes.

Subdues Sore Throat In a Short Time

When a severe cold grips your throat, when it makes you cough and cough—think the time you ought to apply good old "Nervine." This wonderful fluid sinks right in, penetrates to the very core of the affected region. You get a truly wonderful effect from "Nervine," and for sore throat, tight chests and bad colds nothing else will do the same as "Nervine." Five times stronger than other liquids, full of pain-killing power, "Nervine" is a necessity in every home. Get a 50c bottle today.

May Improve Silk Industry

Report That Japanese Professor Has Performed Two Inventions

Prof. Kiyono Inoue, of the Secretariat School in Tokyo, Japan, has reported two inventions that are expected to greatly affect the silk industry. One of these is said to be a machine for spinning silk from old rags and scraps, while the other is a simple method of obtaining silk from silkworms without waiting for the formation of the cocoon.

Her Nerves Were "All Broken Up" She Could Not Sleep

Mrs. David Gallagher, 37 Lyndhurst Ave., Hamilton, Ont., writes: "My nerves were all broken up and I could not sleep at night, and I would have to get up at bed and walk the floor hours at a time."

One-Dish Dinner

In many families it is a problem to serve up a simple meal on one course. Here is a dish that will please a family of six, besides having the indispensable elements of nourishment:

- 2 cups cooked macaroni
- cup cold corn (diced)
- tablespoons grated onion
- tablespoons chopped parsley
- tablespoons chopped fresh red pepper
- cup chopped ham
- tablespoons buttered milk
- cup Borden's St. Charles Milk
- cup water
- tablespoons butter
- tablespoons flour
- teaspoon salt
- teaspoon paprika

Cook macaroni in boiling salted water 25 minutes. Make a white sauce of butter, flour, milk, water, salt, paprika. Place a layer of macaroni in a well-greased baking dish, with ham, carrots and seasonings. Repeat with all are used. Pour over all the white sauce. Bake in a moderate oven for 40 minutes.

In some sections of Kentucky a rithmon who cannot hit a nail head at a distance of 120 feet is considered a poor shot.

Pigeons Killed By Aeroplane

Flock Passed Through Rapidly Revolving Propeller of Passenger Plane

A flock of pigeons recently flew into one of the propellers of a Hanley-Pago passenger aeroplane, which had just left Croydon Aerodrome on a flight to Paris.

Usually birds avoid aeroplanes and the pilot was surprised to see the pigeons fly straight towards the machine and apparently pass through the rapidly revolving propeller of the starboard engine.

The aeroplane suffered no ill effects, but about 20 dead pigeons were picked up just outside the aerodrome.

CHILDREN LIKE THEM

Baby's Own Tablets Are Effective and Easy to Give

You do not have to coax and threaten to get the little ones to take Baby's Own Tablets. The ease with which they can be given, and the fact that they are so effective, will appeal to every mother. Baby's Own Tablets are so easy to give, you know just how low a dose has reached the little stomach. As a remedy for the ill effects of indigestion, from derangements of the stomach and bowels they are most satisfactory.

Mrs. Ross Voyer, Williamstown, Conn., says: "I used Baby's Own Tablets to get the little ones to take Baby's Own Tablets. The ease with which they can be given, and the fact that they are so effective, will appeal to every mother. Baby's Own Tablets are so easy to give, you know just how low a dose has reached the little stomach. As a remedy for the ill effects of indigestion, from derangements of the stomach and bowels they are most satisfactory."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wave Length Changed

The Canadian, British and United States entered into an agreement by which passenger ships of all three countries after October 1 ceased operating their wireless apparatus on the wave length between 200 and 400 metres wherever they are within 200 miles of the coast of Canada, the United States and the British Isles. The purpose was to relieve radio broadcasting from a type of interference which has been an increasing cause for complaint.

Genie Aspirin Proved Safe

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

- Nervitis
- Pain, Pain

Each unbroken "Bayer" package contains 10 tablets, directions and a list of twelve tablet cost 25 cents. Druggists sell small bottles of 24 and 50.

Must Maintain Navy
If Great Britain was a continental power she could see her navy go with equanimity, but Great Britain is not England alone. It is South Africa, it is Australia, it is Canada. It is the Pacific. It is the Indian Ocean. The Union Jack from the masthead of the British navy is it is goodbye to the Commonwealth. The British empire is the British fleet. If we are to preserve the one we must maintain the other—London Daily Express.

In Salvador, Central America, oranges sold three for two cents.

Use Of Aeroplanes In North Limited

Hammock Ice Renders Operation Uncertain Says Donald MacMillan

Disabilities are the only aircraft that will be able to thoroughly and satisfactorily explore the Arctic wastes, according to Commander Donald MacMillan, who has returned from his latest expedition to the north. Aeroplanes are feasible to a certain extent, the commander said, but their operation is surrounded by great uncertainty on account of the difficulty of landing anywhere away from the home base.

The ice is hummocky, and to alight upon it involves great danger, and normally means that it will be almost impossible to rise again, even if serious injury is avoided in gliding down. In a word, planes, to be safe, must fly directly from their base and return home without alighting.

Slavery In India

British Will Soon Stamp Out Last Survive Mart

The last spot on the British empire's map where human slavery still exists is the Hukaw Valley in the upper portion of the Indian province of Burma. By next May the empire hopes to have removed this last vestige of the dominions and placed directly under its control, and from those bordering it as well.

The local potentates have agreed that the price shall be set for each class of slave in the Hukaw Valley, and once it is fixed the bondsmen are free from their masters. A veritable free and equal life the rights and privileges of other freemen. The slave is then to work out the purchase of his freedom by paying each annual instalment.

Many children die from the assaults of worms, and the first cure of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powder. They will not only expel worms from the system, but kill the eggs, thus preventing a recurrence. A remedy for many of the ailments that beset infants, including them and changing their lives.

Has Amazing Possibilities

Experiment at Wembley Suggests Wonderful Idea For Lighting

There was a remarkable experiment conducted by the post office section in the British Government Pavilion at Wembley Exhibition. A crown, a pillar of that in the Tower of London, studded with forty small electric bulbs, was kept lighted by an electric current drawn from a high-frequency generating circuit some distance away. The possibilities thus opened are enormous and again require no constant attention as we are on the threshold of new discoveries. Before long it may be an everyday occurrence to draw electrical energy from the atmosphere that envelops the earth, nature's own laboratory. For the present this is a wireless age, and experiments are being conducted in this fascinating research, with their next advance possibly a lighting aerial. Indeed, a London writer thinks it possible the near future may find us obtaining electricity for lighting and heating and possibly cooling by an antenna on the roof connected with domestic switches. There are indeed more possibilities of that than usual in prophecy.

Prevent Grippe with Minard's Liniment

Illustrating Smallness Of Atom
To illustrate the infinitesimal size of an atom, Professor Niels Bohr told a meeting of Scandinavian naturalists that to count the atoms contained in one cubic centimeter of air, the person of the earth, the whole of the earth, would have to count for more than 1,000 years and then their task would not be finished.

Conquers Asthma.
To relieve from the terrible sufferings of asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. B. Keen's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic inhaling of mists or fumes from the remedy prevents attacks and often effects a permanent cure.

Prevention of Disease
Medical science is striving more and more toward the prevention of disease as against the cure of disease. But in nearly every case the selection of prevention is little more than the selection of food.

What medicine needs to less serum and more food and more food. The best food and more common sense. Vancouver Sun.

An Essentially Canadian Industry. Fur Farming Is Developing At Rapid Rate, East And West

Fresh indication is continually being given of the remarkable manner in which Canada's newest industry, that of fur farming in its broadest conception, is achieving the popular imagination and exciting fresh followers as well as periodically broadening the scope of its activities. With surprising frequency announcements are made of success attending the efforts to bring under domestication some new species of Canada's fauna, whilst a very gratifying number of individuals, visioning the future status of the industry and the profits to be derived therefrom, are going to join the "fur army" of Canada's fur farmers. Governments anticipating the same possibilities and recognizing the importance of intelligent development and early establishment are beginning to take steps for the encouragement of the industry and to put in effect measures for the achievement and maintenance of a high standard.

Prince Edward Island has been progressive in this regard, as is natural. In the mid-portion of the industry, a research experiment has been established through the co-operation of provincial and federal governments to prosecute work for the introduction of breeders all over the Dominion. Ontario, according to recent announcement, has given the fur farming industry the same treatment to fur farming in a very practical manner. It is to establish and operate a fur farm under expert supervision for the encouragement of the domestic rearing of all of the wild fur-bearing of the province. The aim of the government is to train and instruct fur raisers by educating them, creating a fund of valuable information for their use, and selling them really first-class stock for establishing their own provincial department of agriculture. The province has announced that it plans to institute an operational fur farming service designed to meet the requirements of small operators for a medium of marketing, and which will not only serve the needs of farmers in the north, but those of Alberta's growing ranks of fur farmers.

Noteworthy signs of the expansion of the newer phases of the industry are to be observed on every hand. The industry is rapidly achieving by fur farming has been almost universal, and all over the country, sections of man-hunted previously considered worthless, are being transformed into profitable nurseries. The industry of chinchilla rabbit farming, so recently inaugurated, promises likewise to reach considerable proportions. Establishments for raising this little animal, introduced from Europe and proven thoroughly successful in Saskatchewan to thrive particularly well in the rich Canadian climate and raise a richer, more valuable pelts, are now to be found in Ontario and British Columbia.

On the Pacific coast, and in fact throughout Western Canada, fur farming is exhibiting a remarkable growth. Residents of that broad territory, getting away from the narrow conceptions of agriculture and entering more extensively into the greater phases, have adopted the domestic rearing of fur-bearing with characteristic vigor and enthusiasm. On Vancouver Island, where less than eighteen months ago there were not half a dozen fur farms, there are today about forty. A similar popularity is to be observed throughout the prairie provinces.

Fur farming, as a broad, well-planned activity developing out of fox farming, is an essentially Canadian industry whose era is rapidly approaching. Already, in expert opinion, its future is assured and it will in time become as staple as wheat growing, cattle raising or mixed farming. Fur production will slowly become revolutionized, and instead of the piles of rich furs which go for half a dozen for the over the world being brought in from the Arctic tundras, they will emanate from small, intensive fur farms, raised by men living under the pleasant of such conditions.

Would Come To Canada
One hundred exclusive men from the East End of London, after having visited the Canadian and Australian pavilions at the British Empire Exhibition, passed a resolution urging the British Government to spread a portion of the date for the establishing of unemployed men in positions in the overseas dominions.

Lighting strikes oak trees most frequently, and after the oak comes the elm, chestnut and pine.

Being broadminded is all right, but there is a danger. Broad straits usually are very shallow.

W. N. E. 1901

Factors In Milk Contamination

Proper Procedure To Follow In Order To Produce Clean Milk

In the report of the comparatively recently organized division of bacteriology of the Dominion experimental farms, covering the year 1924, it is shown that the factors which act prominently in the contamination of milk are, first, carefully cleaned pails, and, secondly, the health and cleanliness of the animal itself. Pails should be carefully cleaned and well dried. Care should also be taken that the milk is not contaminated by dirt, manure, or other particles get into the pail during milking. Dr. A. Grant Lockhart, the Dominion agricultural bacteriologist, who is responsible for the report, which can be had at no cost on application to the publication branch of the Dominion experimental farms, Ottawa, deals with other factors that are apt to cause milk contamination. Tests have been made at the central experimental farm to ascertain how the milk is affected and statistical tables are supplied showing to what degree milk is contaminated by unsanitary conditions pertaining to the milking, feed, stable and utensils. A clean pail, a covered pail and a clean animal, however, the doctor, are the big things in producing clean milk. A study is in addition given of bacteria production, the doctor, are the big things in producing clean milk. A study is in addition given of bacteria production, the doctor, are the big things in producing clean milk.

microbiology of frozen milk and of fat rancidity. Cleanliness is next to godliness in agriculture the same as in the home.

Record Cattle Shipments

Canada's Revenue For 1925 From British Markets Over \$125,000,000

With the close of 1925, Canada's cattle shipments to the United Kingdom for the year will be considerably in excess of 100,000 head, constituting a record. The monthly average will be about 8,300 head. In money the year's total will be above the \$125,000,000 mark. These predictions are made by an Ottawa authority on the basis of a total of over 1,000 head up to the 15th of October.

The British admiralty some time ago sent a number of cattle to the United Kingdom, but then required for other purposes, so that there is no wharfage now available for the discharging of Canadian cattle.

In the near future it is hoped that success will crown the negotiations between the Canadian and British authorities for a highly specialized system of ocean cattle transportation that will reduce the cost and ensure regularity of delivery at British ports.

Record Movement Of Wheat

Grain Marketed On C.P.R. Lines at the Rate of Seventy-five Bushels Per Second

More than 75,000,000 bushels of wheat, 30 per cent. of which has graduated contract, has been marketed in the prairie provinces during the month of October, according to the railway reports. This is a record movement. At all the wheat marketed during September along the Canadian Pacific Railway were baked into bread and loaded on standard delivery wagons, each wagon containing one thousand bushels, and travelling at the rate of five miles per hour, it would take eight and a half weeks for these wagons to pass a given point. The marketing of grain on the C.P.R. in September amounted to 62,269,367 bushels. In twenty-five one-hour working days, the total of over 75,000,000 bushels per second.

British Cattle Raisers Worried

Foot and Mouth Disease Has Again Broken Out

Cattle raisers are worried over a recurrence of the foot and mouth disease at several places in England. Recently had a number of agricultural shows withdrawn of the last restriction dealing with the disease has been announced when an isolated outbreak occurred in the south of England, and there have been several others. The restrictions have been reimposed in some places, notably in the counties of Devon and Dorset, and sheep are brought in from Wales and Westmorland and slaughtered. Under the new restrictions, any sheep or cattle coming in must be immediately slaughtered.

Women are to be employed exclusively as announcers in the new broadcasting station in Tokyo, Japan.

After a woman reaches the age of 30 it is impossible to conceive her that the good old days.

Dairying Makes Progress

Nine New Creameries Established In Saskatchewan This Year

"That there is confidence in the future is shown by the fact that nine new creameries have been established in Saskatchewan this year. While the majority of these are in the northern and central portions of the province, three are situated in the south. In the heart of the grain growing section, where a few years ago dairying was not by any means considered an important branch of agriculture," said P. G. Kild, dairy commissioner for the province.

In addition to the new creameries, five new cheese factories have been built and have commenced operations and two creamery companies have been organized in the province. The new cheese factories are situated in the districts ranging from the extreme north to the southern part of the province.

It is worthy of note that most of them have been established at points from which a large quantity of cream was previously shipped. In this way some of the milk which was formerly sold as cream for buttermaking is now made into cheese.

Obstacles In Way Walker's Plan

Canadian Director's Immigration Scheme Commented On By London Paper

The Nation, a London weekly, discusses the migration scheme of J. Bruce Walker, Canadian director of European migration, who recently, in outlining his programme for obtaining emigrants for the Dominion, suggested that the United Kingdom might be set up in the United Kingdom for training in agriculture of the surplus of the unemployed and through these training centres 20,300 men could be absorbed in Canada within a year.

"If Bruce Walker should be permitted in his undertaking all parties in England will rejoice," the paper says, but the paper intimates that the carrying out of the scheme may not be so simple because of the Dominion's attitude as to the sort of immigrants desired.

"The Canadian immigration authorities have been rigorously selective," the Nation continues, "and they certainly will not relax under the new system. Preference will necessarily be given to the best families from the land and to skilled artisans. On the other hand, the main of Britain's best must be stimulated. For Canada no other policy is conceivable, but Bruce Walker's plan gives urgency to the need for a consistent immigration policy for Great Britain."

See Danger In Liquor Traffic

Woolen doctors, lawyers and economists of Germany favor local option and see in the excessive use of alcohol the cause of the economic disaster in Germany. They held a joint conference, with delegates from the Association of German Women Physicians, the Federation of Women Lawyers and the Association of Women Economists, at the conclusion of which a resolution was adopted favoring local option. Reichstag in favor of local option.

Only a few more weeks before winter is with an angry, better be looking up an old flame.

Health Of Our Livestock

Good Progress Has Been Made In The Control Of Disease

There is much of a comforting nature in the report for 1924-25 of the health of animals branch of the department of agriculture at Ottawa. The veterinary director assures Dr. George Hill, in reviewing the condition of the animals branch of the department, that the health of animals has been improved in many respects. In the past few years there have been outbreaks of disease in many parts of the country. In the past few years there have been outbreaks of disease in many parts of the country. In the past few years there have been outbreaks of disease in many parts of the country.

Good progress is being made in the control of bovine tuberculosis. Livestock is free from many diseases. Good progress is being made in the control of bovine tuberculosis. Livestock is free from many diseases. Good progress is being made in the control of bovine tuberculosis. Livestock is free from many diseases.

There is also a tuberculosis free area in the Carman district in Manitoba, which is being dealt with under the restricted area plan. All cattle in an area comprising the counties of Huron, Chatham and Deseronto in the province of Quebec have also been tested by veterinary inspectors and reactors destroyed. There is every reason to believe that this area will be a tuberculosis free area by the time the next annual report is made.

The White Collar Job

The old idea that a white collar job is a low salary, better than an overall job at high wages has been abandoned pretty generally since the cost of food and clothes has advanced. Men, especially those with families, must have money, and they no longer feel that it is necessary to earn it in a low salary. —New York Herald-Tribune.

Ephraim: 'What you all call it when

you get married three times—illegitimacy.

Rasmus: "Lawsy, boy, you satiffly am an innocence. Why, when a girl gets married two times, dat an illegitimacy; but when she gets married three time, dat an trigonometry."

Birds taught by sight. Beasts of grey depend upon the sense of smell.

Sugar Beet Cultivation May Prove A Great Factor In The Prosperity Of Western Canada

Making Progress In

Fight Against Rust

Saskatoon Scientists Make Further Discoveries In Complicated Struggle

The rust work carried on for some years at the University of Saskatchewan is assuming new phases in the plant breeding experiments conducted in the cereal breeding section of the field husbandry department.

The end in view is a wheat that will have all the good qualities of the best strain of Marquis wheat which will also be highly resistant to all the rust strains found in Canada. During the past season a large number of crosses were made with Marquis on a highly rust resistant strain of Junco. At present there has already been developed a highly rust resistant cross between Marquis and Junco, which is known as Marquis-Junco 41. This cross is of good quality, high yielding, combining in a high degree the milling qualities of Marquis, as well as the hard and strong straw of Junco, but the flour is too yellow to be satisfactory to the millers. It is hoped by back-crossing Marquis with Marquis-Junco 41 that a strain may be produced which will have the flour color of Marquis combined with the rust resistance of Junco.

It will take many years and many dozens of crosses together with careful selection and testing before the desired results are obtained. In undertaking these experiments the scientists in charge make it very clear that he has no assurance that a high quality wheat may ever be developed.

City and Country Co-operation

The City Should Work Actively For Rural Prosperity

Some years ago city people used to ridicule country people, and country people felt jealousy of city dwellers. While much of this exchange of sentiment was fairly good natured, yet it often went so far as to create antagonisms that destroyed all co-operation. The cities and country regions are dependent on each other. It is as absurd for city and country to quarrel, as for a merchant to quarrel with his customers, or for a business man to quarrel with his help. The time is fast coming when a city and the country around it will be considered an indivisible unit, with identical interests. The city will work actively for rural prosperity to increase its own business, and the rural people will work for the advantage of their centre to provide a stronger support for their enterprises. —Stamper News.

A Suggestion

Young Mistress: "What would you do, Marie, if you could play the piano like Marv?"
Servant: "Oh, I should certainly take lessons."

Good imitations are sometimes superior to poor originals.

The new million dollar beet sugar

industry in the Canadian sugar beeteries Ltd., at Raymond, in Southern Alberta, has started operations, resulting in the shipment of a sugar beet industry in that territory under the most favorable conditions. It is now evident that this new Alberta activity is away to a good start, and with the sureness of foundation, has great possibilities.

After exhaustive investigation and preparation, United States interests entered the Southern Alberta field for the refining of sugar from beets in the spring of 1925. Foundry was made to erect a sugar refinery at Raymond, in the heart of the irrigated districts. Farmers would contract for an acreage of 7,200 acres of beets. It is estimated that 7,200 acres have been signed up, and reports during the growing season indicate that the stands were 90 per cent. perfect. The beet sugar crop in Southern Alberta, it is officially stated, is exceptionally good, and it will not be surprising if the tonnage produced reached 30,000 tons.

Such a successful year of inception opens up great possibilities for the sugar beet industry in Alberta and all Western Canada. The possibility of the industry becoming a leading standpoint in the area has never been in question, climate and soil being most favorable. Experiments have proven an excess in both tonnage and sugar content in Southern Alberta production over that of the Western States.

Farmers in the area have become enthusiastic over the possibilities of the sugar beet industry. More and more general interest has been created. Authoritative opinion has it that the beet crop devoted to this crop next year will be well over 100,000 acres, and that by 1927 there would be sufficient beet grown in Southern Alberta to meet the needs of the sugar beet industry. The same authority predicts a time when there would be even more sugar factories in the section to take care of the crop.

This is a very gratifying development of the year's agriculture in Western Canada, regarded directly and indirectly. Apart from the revenue from the sugar beet industry, the general agricultural situation of the beet growing districts is to be expected. From the development of the sugar beet industry and other phases, such as have been the experience of similar ventures in other parts of the world, it is confident that it will prove one of the greatest factors in the prosperity of Western Canada, and there is every opportunity for expansion of the industry there.

Tree Wins Three Million

New York Girl Finds Tree Farming Is Profitable

Tree cannot, it is true, be made by poets, but they can be nurtured with such loving care and skill by someone who has studied them and understands the reasons why they grow. A girl who has done this is Miss Mary Smith, who has been successful in her tree farming.

Miss Evelyn W. Smith, of Amherst, N.Y., has for an extended her father's cherished hobby—tree farming—that her estate at the foot of the Berkshire hills, 1,000,000 trees, worth about \$200,000. For sixteen years Miss Smith has worked at her tree culture with patience and enthusiasm until today her nurseries are visited by admiring tree lovers, landscape architects and rollies of foreign spectators interested in the results of her experience.

The sturdy, beautiful Amherst trees are as much in demand for memorial purposes as for landscape decoration. Only a short time ago a beech was sent to Belgium to express by a living symbol the friendship between the children of the two nations.

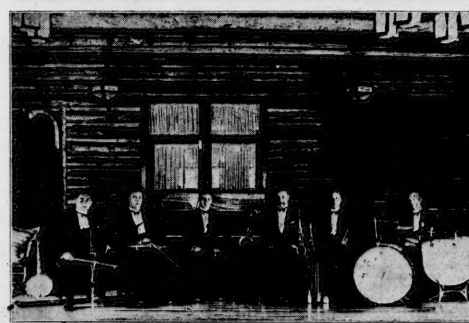

Getting Rid Of Farm Pests

More than a quarter of a million crows' eggs, crows' feet and gopher tails were distributed in the crow and gopher extermination competition carried on this season by the Manitoba department of agriculture. The exact numbers are: Crows' eggs, 175,149; crows' feet, 28,242; gopher tails, 7,152. The province has distributed \$2,150 in prize money.

The Equinox Myth

In days gone by mariners looked for storms in the week following the 23rd of September, which is believed the vernal equinox. Now scientists tell us that it is no more likely to be stormy at that time than at any other time during the early fall. —Pitt-Houston News.

FORT GARRY ORCHESTRA FOR RADIO

Radio fans in Western Canada and the Western States who enjoy music, expressed their appreciation of the studio dance music programmes from station CBNR in the Fort Garry Hotel, Winnipeg, with this winter had a new orchestra entering to their enjoyment. Photograph shows the new Fort Garry Orchestra, headed by Mr. A. Plumm, which has opened its winter season at this hotel, and the program which will be heard every Wednesday evening in both studio and dance sections from the new studio of CBNR which is located in the Fort Garry. At Jasper Park Lodge during the summer months, Mr. Plumm's orchestra was the premier of hundreds of tourists, both Americans and Canadians, who stated that in their travels to the various summer resorts on the continent, they had not found an orchestra which surpassed that of Jasper for either dance or concert numbers. The Fort Garry Orchestra will be broadcast every Wednesday evening as if they were studio and dance numbers at the Fort Garry.

Elk Initiation

Plans for the big Elk initiation which will take place in the Odd Fellows Hall here on December 9 at 8:30 o'clock, are well under way. The Lodge supplies have arrived and District Deputy Dr. J. L. Gibson has the arranging of degrees taken in hand. It is certain that a big class of candidates will take the degree of Elkdom on the above date. The Elk organization with its well known pep and vigor for putting life and action into the community, always appears strongly to the farm men and they are signing up in goodly numbers.

The town will not likely be behind very much in their quota when the membership roll is handed to the district deputy on initiation night.

Santa Approves a Christmas Gift

Santa Claus has been down a great many chimneys since he started business, and he is intimately acquainted with a large number of people. He knows that the best kinds of gifts are those which please the whole family, and bring the excitement and enjoyment of Christmas every week. That is why he looks so jolly when he receives hundreds of subscriptions to The Youth's Companion with which to fill his pack. And, being wise from long experience, he knows that people are likely to overlook things around Christmas, so he chuckles when he sticks a Companion into the top of a stocking. "He as greedy as you like," he thinks, "the more the better for you."

The 52 issues of The Youth's Companion for 1925 will be crowded with serial stories, short stories, and puzzles, and fun. Just send your order to the address below and Santa will take care of delivering the paper to your door, or to the home of a friend. Subscribers will receive:

1. The Youth's Companion—52 issues in 1925 and 1926.
2. The remaining issues of 1925. All for only \$2.
3. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only \$2.50.

The Youth's Companion, 52 N. Dearb. Road, Mass.
Subscriptions received at this office.

The following committees have been appointed to solicit subscriptions for the Wood's Orphan Homes:

Town Committee—Mrs. David McEwen, secretary; treasurer, Mrs. John Dahl; Mrs. O. L. Reincke; Mrs. J. R. Watt; Mrs. C. W. Stewart; Mrs. George Ringrose; Miss Nettie Thompson.

Country Committee—Mrs. J. S. McNamara, secretary; treasurer, Mrs. C. E. Henker; Mrs. J. L. Salmon; Mrs. D. Reynolds; Mrs. O. Mosley; Mrs. E. Fenton; Mrs. W. A. Horcher; Mrs. M. S. Weatherhead; Mrs. Nell Olmstead; Mrs. W. Davies; Mrs. F. Laing.

Northern Light—Mrs. T. R. Evans; Mrs. J. R. Davidson; Mrs. A. H. Gillard.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the Estate of Vern Hoshaw, late of Claresholm in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Robert Hoshaw, who died on the 8th day of September, A. D. 1925, are required to file with the undersigned J. R. Watt, Solicitor for the Executor, by the 30th day of November A.D. 1925, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executor will not be bound to pay the assets of the deceased among the parties entitled thereto, having regard only to the claims of

which notice has been so filed or which have been brought to his knowledge.

Dated this 19th day of October A. D. 1925.

R. Watt,
Solicitor for Delbert Reynolds, the Executor,
Claresholm, Alberta.

Here and There

In last last fiscal year 3,543 home-made articles were graded in the Prairie Provinces, aggregating an approximate area of 614,880 acres, while, in addition, 710 odder grains of 115,000 acres, make up a grand total of 728,480 acres so settled.

In 1915 Canada exported no wheat to China. In 1918 she sent only eight bushels to Japan. In 1924 China imported over 5,000,000 bushels of Canadian wheat and over 1,500,000 barrels of flour, while Japan took 7,000,000 bushels of wheat and 110,000 barrels of flour. It is predicted these figures will be well beaten for the current year.

The Grand Challenge Cup, emblematic of the First Aid Championship of the entire system of the Canadian Pacific Railway, will be competed for at the Place Vigier Hotel, Montreal, November 15. The champions in a knock-out competition among Eastern and Western teams respectively, will fight it out for the trophy.

Plans are already being laid to make the 1925 Eastern International Dogged Derby an even greater success than that of last previous year, and it is reported that the prize money will be considerably increased next winter, with the object of attracting more teams and spectators from the West and the United States.

Fire Prevention Week, October 4-10, was observed throughout the Dominion, and to mark the sense of the importance of the occasion Mr. Grant Hall, vice-president of the Canadian Pacific Railway, broadcast an appeal by wire to every officer and employee of the system "to cooperate as to the past and set a good example by thoroughly cleaning up all premises."

Canada's great outlook, says a recent issue of the London Outlook, is that of a country where, by the use of cultural workers with enterprise, initiative and endurance. Enthusiasm is being shown by emigrants under the joint scheme of settling 3,000 families in Canada are bound to have their healthy effect on relatives and friends dissatisfied with their lot in England.

E. F. L. Sturdee, general Passenger Agent for the Orient of the C.P.R., with headquarters at Hong Kong, has been appointed Assistant General Passenger Agent of the system at Montreal. His duties commenced here in October. He was released of his other work owing to ill-health, but the climate of Canada soon restored him to physical well-being. He has a long record of service with the C.P.R., dating back to his first appointment at Saint John in 1894.

Sixty bushels of wheat at every tick of the clock is the rate at which the Canadian Pacific Railway have arrived the grain into the elevators this season. To keep up this unprecedented rush it has been necessary to move one car-load of grain out of Winnipeg at every one minute and twenty-three seconds of the twenty-four hour day. Grain dealers in the heart of the lake by the Canadian Pacific in September alone would fill a fleet of 200 ships, each with a cargo of 200,000 bushels.

Back from an extended tour of inspection over the company's western lines, E. W. Beatty, chairman and president of the Canadian Pacific Railway, found a very marked improvement in the West as compared with that which had existed when he last went across the country. He thought the spirit of the people was much more optimistic and with very good reason since the considered it safe to say that 380,000,000 bushels was not too high an estimate for the total Canadian wheat yield this year. He noticed throughout the country a sustained interest in immigration and a more general realization that therein lay the soundest remedy for most of Canada's difficulties.

For Sale Cheap—House and five acres tract close in, east of Pioneer elevator, all in cultivation; also Gray Dort touring car, cash or easy terms. For further information write to W. G. McElrath, Raymond, Washington, Box 924.

Here and There

"Canada has the greatest opportunity of any community on the face of the earth," stated St. Lee Stronchy, owner and proprietor of the Litchey Spectator, in the course of a recent address before the Canadian Club. He stressed the advantages the country enjoyed in her large white areas, electrical energy, wood pulp and mineral assets.

Between 20,000 and 25,000 men are expected to work in the forests of the Province of Quebec during the coming winter, according to the chief forester of the province. It is anticipated there will be a good season in the pulp and paper products, but that the cut of lumber will not be so heavy owing to the low price prevalent for sawn lumber.

Cardinal relations between the ports of Quebec and Liverpool were emphasized recently by the exchange of cables by the respective Chief Magistrates of the two cities. The occasion was the Civic Week Celebration at Liverpool when the Lord Mayor, Thomas Dawd, sent Mayor Joseph Samson, of Quebec, greetings to which the latter responded.

A record for October weddings was established at the Windsor Star, Montreal, early in that month when twenty couples invaded the Concourse on their way to Boston, Quebec, Ottawa and Toronto. Two of the bridegrooms were named following time-honored custom. It was said to be the fashion to subject the bride to this usage, but since the advent of short skirts the practice has been frowned upon.

Establishing what is easily a world record for movement of wheat, grain poured into Port William and Port Arthur elevators at the rate of nearly thirty bushels a second for the whole of the 24 hours of October 5, from Canadian Pacific Railway cars. In all, 1,274 cars were unloaded during the day and each car carries an average load of 1,500 bushels, representing a total of 2,550,000 bushels.

Driving into stationary trains on level crossings seems to be a favorite sport on the part of a number of motorists judging by reports coming in recently from different sections. The latest, is from Galt, where a light car, standing in a freight train consisting of 15 loaded and 15 empty cars, ran into the train on a crossing. Fortunately no one was hurt, but the instance is another of gross carelessness on the part of motorists.

The Grand Challenge Cup, emblematic of the First Aid championship of the entire system of the Canadian Pacific Railway, was won by the Weston shoes team of Winnipeg, champions of the West, against McAdam, N.B., team, champions of the East and last year's winners, after a searching test of the two teams conducted at the Place Vigier Hotel, Montreal, recently. The margin between the two teams was so narrow as to be in doubt to the last moment. Weston took 507 points, while McAdam had 492.

Tourist traffic development throughout Canada has reached such proportions as to equal the value of a fairly good wheat crop, and there was work for all along to the highlands of the Yukon, in the opinion of Colonel Phil. Moore, of Yoho Valley, B.C., interviewed recently. He thought that an estimate of three hundred million dollars spent by tourists annually in Canada was not too high. Growth of interest in the Canadian Rockies was so noticeable and although the majority of tourists there were Americans, yet Canadians, too, were beginning to discover its value, said the Colonel.

The Woman's institute is giving a tea and sale on November the 28th.

ALPINE CLUB OF CANADA ENJOYS RECORD MEET

Upper Abbot Pass Hut and Glacier Park. (Lower) Director Wheeler making report at the annual meeting. (Insert) Mr. Wheeler right, congratulating Capt. MacCarthy, who just returned from exploring Mount Logan.

"The camp this year was one of the best climbing camps we ever had," said J. B. Moffatt, regarding the outing of the Alpine Club of Canada, at Lake O'Hara, this summer. The weather was ideal and there was work for all along to the highlands of the Yukon, in the opinion of Colonel Phil. Moore, of Yoho Valley, B.C., interviewed recently. He thought that an estimate of three hundred million dollars spent by tourists annually in Canada was not too high. Growth of interest in the Canadian Rockies was so noticeable and although the majority of tourists there were Americans, yet Canadians, too, were beginning to discover its value, said the Colonel.

The high mountains were in a better condition this year than they have ever been before owing to the scarcity of ice. From 50 to 60 metres were cut in the snow. The two days' trip over the passes being very popular. Through the courtesy of the Canadian Pacific Railway, which placed its hut, situated at the top of the Abbot Pass, at the disposal of the members, the work of climbing was greatly facilitated.

The annual business meeting of the Club was held at Lake O'Hara Camp on August 15th. This was an auspicious occasion, for Capt. MacCarthy, leader of the Mount Logan expedition and Henry S. Hall, one of the Mount Logan guides and the mountain but at Abbot Pass.

WORLD HAPPENINGS
BRIEFLY TOLD

The largest map in the world is being made at San Francisco. It is to be 600 feet long and 18 feet wide.

The largest carbon imitation for twenty-five years was reported in the Copper River country, Alaska.

Britain's claim of 26 million pounds from Russia on account of war debt has been sealed down to 10 million pounds.

The New York Times estimates the loss to the anthracite industry and three railroads by the strike of the anthracite miners, which began September 1, at \$165,000,000.

Manitoba's Government-owned telephone system is having a successful year. Total earnings for September were \$17,069.98, or nearly 4000 per cent over August.

Foot and mouth disease among cattle is spreading in Lancashire, England, and two new outbreaks were reported recently. A large number of affected cattle have been destroyed.

The bid for the purchase of the Winnipeg Electric Railway for \$12,127,000 will not be submitted to the ratepayers at the civic election in November.

A public park is to be created by the territory of Hawaii at Kealahou, on the Kona coast. The park will include the monument of Captain James Cook, famous English navigator and explorer, and the 562 square feet of British territory which was ceded to the United States in 1899.

Thirteen years ago 125,000 tons of traffic passed by the "Elephant and Castle" London, every year. Today the amount has increased to 125,000 tons.

Traffic at the Hyde Park Corner has grown from 55,000 tons in 1912 to 130,000.

A Cairo dispatch to the Daily Mail says it is officially announced that the tomb of Amenhotep was re-opened. The tomb was discovered in 1908, and was lifted, revealing another sarcophagus on which lay a thin linen cover and several bouquets of flowers in a good state of preservation.

Relics of Ancient Mayas

Remains of Explorer Are Now in British Museum

Relics of the ancient Maya civilization, to the number of about 200, which were unearthed recently by Mr. F. A. Mitchell-Hedges, the explorer in the hitherto unknown interior of British Honduras, are now in the British Museum in London.

Most of them are fragmentary examples of pottery, including a miniature head of a smiling man which might have been modelled to, so strikingly "modern" in its spirit.

It appears from the character of his finds, however, that Mr. Mitchell-Hedges may well succeed in bringing to light data about the Mayas' lost civilization which may enable us at least to solve a great mystery, for the beginnings of the Mayas are dated 1500 B.C.

Among the finds he has brought to the museum is a small, dark, black, egg-shaped object which he suggests that perhaps was not unknown to the Mayas, and it is certain that they produced pottery with moulds.

Factory Turns Out Speeches

Pennsylvania Firm Sold Three Million Last Year

A writer in a United States paper has received a circular from a Pennsylvania factory for the manufacture and sale of after-dinner and other speeches. Before receiving this he had no idea of the magnitude of the industry. The management announced it sold three million speeches in 1924 and confidently expects to double its output in 1925. The thought is appalling.

We hear much of free speech, but the company claims to have sold those productions at prices ranging from 25 cents to \$10 each. Stocks of free speech can be had for \$2.50 for 25, and twenty for \$5. As to their quality: "The data is accurate, the English clear, forceful and convincing. What more could be wanted? If a free speech is not desired choice may be had of three hundred 'magnificent' stories, or many 'models' for all occasions, plus one hundred ideas for entertainment committees. Twenty-five short pieces can also be had for \$2.50, to relieve anyone embarrassed by the call to 'make a speech.' The longest felt was filed in 'one hundred ways to introduce a speaker.'"

A Good Story

If the Turks who are trying to push John Bull out of Mosul were not "young Turks," they would probably know better than to try to resist, for John Bull is the champion self-faster of the universe—Burr Transcriber.

Frailty Of Men Of Strength

It is Found That the Strongest Men Frequently Die at Early Age

Twenty-five or thirty years ago Eugene Sandow was not only "the strongest man in the world," but he was unquestionably the finest specimen of physical manhood of his day and generation. Every boy who had seen him had been struck by the development he had attained. He was the son of an Englishman, and the effects of an automobile accident some years ago are said to have hastened his end.

One week ago Edmund Brubaker, again "the strongest" man in the world, who was touring Canada a few months ago, died quite suddenly. There was also John Marx, who was Sandow's immediate successor. His hero-homeliness in two with his naked hands, smothered under a blue of his fat, stood on a high pedestal and with a harness on his shoulders lifted in exultant off the ground. He died of consumption in his early forties.

The bulging muscles man is generally the object of envy and admiration by other men. The envy is sometimes unwarranted. The so-called strong man is often a frail reed, and it is not to be wondered at that the strong men frequently die at an early age. The strong man neglects the care of himself that a less powerful man would do.

Phone Test Is Successful

Alberta Now Linked With United States and Eastern Canada

Introducing a direct telephone service that will link Alberta with many points in Canada and with every state in the American Union. Lieutenant Governor R. C. Brett, in the office of Hon. W. Smith, minister of railways and telegraphs, is in telephone conversations with the secretary of the state of Montana, and Colorado and Arizona. At the state capital of Helena, Montana, the telephone exchange is exchanging greetings with the people across the line.

Mr. Brett, Greenfield and other government officials were present during the test, which was a complete success for these three states were concerned. The test was an original plan and also includes direct connection with Ottawa and Vancouver, but owing to a short circuit six miles south of Wetaskinew, caused when the wires became entangled with the telephone lines, the latter calls had to be suspended.

Cold On Planet Mars

Scientists Believe That It Registers 100 Degrees Below Zero At Frequent Intervals

Mars may or may not be inhabited, but if so it is a life apparently enjoying anything but a warm and salubrious climate. With the use of an extraordinary delicate instrument he has invented for finding out such distant facts, W. M. Coblentz, of the bureau of standards, Washington, D.C., has concluded that the mean annual temperature of the surface of Mars is in the neighborhood of 20 degrees below zero, comparing with the earth's 52 degrees.

The observations indicate that 100 degrees below zero is not an occasional quite frequently, on Mars. Most of Dr. Coblentz's work on the problem was done last August, when he was in the desert of Arizona, where he was able to make much closer to the earth than is done usually.

Addressing the Toronto Canadian Club at luncheon on the subject "China and the Foreign Investor," Hon. N. W. Howells, K.C., who had just returned from a tour of the Orient, declared that there will not be the least doubt that the power of the Orient is at \$25 a month we would find \$100,000,000 is annually spent in China, or one-half of the world's national debt was ten years ago.

Hungarian Settlers

General Families From Hungary to Settles in Alberta

Baron Joseph Csernay and his brother Andre, who recently bought out a ranch in the Csernay estate, will bring several families from their homeland in Hungary as settlers. These prospective immigrants will be brought in over Canada, and will be settled in the Csernay estate, which is being supplied with improved tracts on the Csernay estate on their arrival.

Our Country

Canada is great. Canada is a land of which every man and every woman should be proud. Big things are being done for our country. Let us be confident and determined, and success, glorious success, will be ours—Burr Transcriber.

Travel Notes

The cabin of an ocean liner, says an insurance authority, is the safest place in the world, and a Pullman berth is next. Stay home if you can, but remember, you do it at your own risk.—Sphenator Spoken.

The Proof of the Pudding

Big Wheat Yields Reported in Many Districts

It is an old saying that the proof of the pudding is in the eating, and in the same logic, the proof of the superiority which Canada offers to farm settlers in the returns which farmers already in the country are getting for their labor and investment. While the statistics for the Dominion as a whole are not yet available, they do carry the same personal conviction as the example of what has been done by individual settlers. Hereunder are a few such examples as published in the newspapers in the districts in which the crops have been harvested. They tell their own story.

A big yield of wheat is reported from the farm of E. Rasmussen, Crooked Lake, Alberta. The crop averaged 45 bushels to the acre from a field of 41 acres. The wheat was the Red Boba variety—Edmonton, Alberta, Journal.

C. W. Johnston, of Deltona, Manitoba, threshed a crop of wheat this season that averaged about 45 bushels to the acre. The usual average in this district is from 30 to 40 bushels per acre—Portage la Prairie, Manitoba, Graphic.

Drastic Reform In Turkey

Myths of Islam Are Removed By Government Decree

One of the most drastic and far-reaching reforms in Turkey, life has gone into effect almost unnoticed by the outside world. The Turkish government's recent decree has thrown out into the world some 20,000 Turkish myths and superstitions—myths of Islam, who are to be untied by education or equipment for any other purpose in life.

The summary decree is at the same time removed from Turkish life one of its strangest and weirdest customs. These devices are divided into three categories—"howling," "whirling" and "dancing." They have largely on the ignorance and superstition of the Turkish peasants, who believe them to be invested with divine power.

Form "New Health Society"

British Organization Aims to Bring About Golden Age of Health

The London Daily Express says that the British organization of Great Britain, the Earl of Oxford and Asquith, the Earl of Balfour and Hanbury Macdonald, with a number of prominent names, have formed a new society aiming to bring about a "golden age of health" in England. This organization, which was formally inaugurated early in December, will be called the "New Health Society."

In the Dominion, the society will be the promoter of disease. The promoters, according to the London Daily Express, have a "new race" to be created by a new way of life. A nation-wide propaganda campaign is to be launched when the society is inaugurated.

Likes Crossword Puzzles

Premier Baldwin Is Said to Be Devoted Follower of the Game

Premier Baldwin is a devoted follower of crossword puzzles. He discussed them with visiting statesmen and one of his favorite tricks during a round-table conference dealing with the subject of disarmament was to introduce a few remarks regarding tricky layoffs of words. It is said, however, that Britain's leader always found difficulty in discovering puzzles sufficiently hard to give him a real taste.

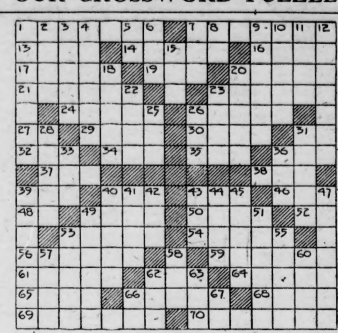

Dust Bath For Hens

Those who intend to have a winter dust bath for their hens should get ahead of freezing weather. The traditional value of dust bath for the purpose is largely a myth, as ordinary earth is better and more easily obtained as a rule. Powdery like earth is better than powdery road dust and it does not make the hens dirty when used in place of road dust. The latter will freeze and be unavailable when most needed.

It is Reported That Washington Will

It is reported that Washington will cut out the same year as the Atlantic cable was laid between England and Nova Scotia.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Claresholm Local News

Bethel United Church

"The Jesus Way of Life" will be the pastor's theme at the morning service next Sunday, November 29, at 11 o'clock. This will be the concluding sermon in the series of studies in Ephesians.

The Sunday school meets at 12 o'clock, immediately following the morning service. A hearty welcome will be extended to all visitors and new-comers.

Mrs. L. C. McKinney will be the speaker at the evening service at 7:30 o'clock, and will speak on "The World Task of the United Church." The foreign mission fields of the United Church give to all members a larger share in extending the Kingdom of Jesus Christ on earth. An interesting and inspiring message may be anticipated.

Nazarene Church Announcements

Holiness becometh Thy house, oh Lord, forever.

Friday night, Young People's meeting, Rev. J. A. Tench, speaker. Subject, "Destroy the Foxes." Prayer Band and healing service Saturday night, 8:30 o'clock. Sunday, 10:30 a.m., holiness meeting. Subject is the same as last Sunday, "A Good Soldier."

11:30, Sunday school.

3 p.m., meeting in Greenbank school.

7:45, Note the change in time. Again our seating capacity was taxed, so come early and be sure of a seat. The subject will be "Broken Hedges," text Ecclesiastes 10:8, "Whoso breaketh an hedge, a serpent shall bite him."

Boys' Band practice Tuesday and Wednesday, 7 p.m.

Prayer meeting Tuesday, 8 p.m. Without holiness no man shall see the Lord.

Four Square Gospel

Meetings conducted by Evangelist R. A. Reynolds, and wife, in Odd Fellows' Hall, Sunday, November 29th.

11 a.m., worship.

3 p.m., Positive Christianity.

7:30 p.m., The Scapegoat.

The Lord is still working in our midst, saving souls and healing bodies. Come and enjoy the flood tide of God's grace. Next Sunday, great opening day of new Four Square Gospel Church. See special ad. Everybody welcome.

Monday, 8 p.m., Orchestra practice.

Tuesday, 8 p.m., Bible study and prayer. (Bro. Thomas' home.)

Wednesday, 8 p.m., Young People's meeting (Bro. Reynolds' home.)

Thursday, 8 p.m., Prayer meeting (Bro. Thomas' home.)

Mrs. Lalor's Dressmaking Shop

Dainty aprons, lovely new house frocks in the latest styles, made from first class prints and gingham, all patterns and colors, and in all sizes. No rush fabric, made garments in my shop, no rough uneven stitches, no slipshod, bituminous finishing; therefore, the Val edging, piping and French seaming is evenly applied, making in all a beautifully finished dress you can wear any time. A nice gift for mother, sister, or a friend.

Men's flannel shirts.

Prices reasonable.

Claresholm Silver Black Fox Ranch

We are offering for sale Silver Black Foxes, same strain as in our pens here, to be delivered next fall. Anyone thinking of buying Foxes, should look our stock over before purchasing. What you want is quality and productiveness. We have both.

A. MCKINNEY & SON,

Breeders of Govt. Registered Foxes, Claresholm, Alberta.

Agents for Park Hill Silver Black Fox Co. Ltd. Calgary.

Paint! Paint! Paint!

I have put in a full line of Martin Senour paints, enamels, varnishes and stains, and Pratt & Lambert auto enamel and varnishes and lined oil.

I do expert auto painting. Now is the best time to make your car look like new.
